Office Action Summary

An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is improper since it fails to recite which claim it depends upon. The recitation in claims 9-11 of a spray system is confusing since claims 1-2 upon which these claims depends fails to teach a "spray system." The recitation that seals are mounted in any orientation in claim 12 is confusing since it is unclear what the orientation is relative to. The recitation in claims 6 and 9-10 of a coating chamber is confusing since claim 1 fails to set forth a coating chamber and unclear how it relates to chamber in claim 1. Claim 6 is confusing since it is unclear what the processing equipment encompasses.

Art Unit: 1734

Claims 4-5 and 7 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The recitation in claim 5, that the angle of the spray nozzle to the seal is 15 to 45 degree does not further claim 1, which recites the angle, is 30 degrees. Claim 4 fails to set forth which claim it depends upon. The recitation of the pump being replaced by a pressurized water supply system is improper since claim 1 indicates the pump is required.

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The signature is not in permanent ink, or its equivalent in quality, as required under 37 CFR 1.52(a)(1)(iv).

Claims 1-12 are would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication should be directed to Brenda A. Lamb at telephone number (571) 272-1231. The examiner can normally be reached on Monday thru Tuesday and Thursday thru Friday with alternate Wednesdays off.
